Installation Instructions

Product #30-100-22 : Dual Vertical Desk Stand

1. Check to see that small hex set screw at rear of base is backed out enough to allow pole to seat down completely (figure 1.1) Insert pole into base. Tighten set screw.
2. Loosen ratchet type handles on pole clamp monitor mounting block. Slide clamp and block down pole and tighten. Repeat for upper assembly. **Note:** Position along pole will depend on size of monitors being mounted. These heights can be adjusted after the monitors are mounted.
3. Attach quick release pivots to back of each monitor with screws provided. Be sure that silver release button is toward the top of the monitor.
4. Place lower monitor on its mounting block by tipping back approximately 45 degrees and then down until silver release button engages hole on block. It will click into place.
5. Repeat for upper monitor.

To adjust monitors:

Left/Right and Up/Down: Grasp monitor with both hands and adjust to desired position. Pivots will allow adjustments and hold once in desired location.

To tension the vertical adjustment to the weight of monitor: Tighten the 5mm bolt on the right side of the pivot with the hex wrench provided.
